WHAT IS SEEN AT THE FAIR

Indiana's Great Exhibit of Industry. Stock and Products from the Fields.

It Is Meeting with the Promised Success in Crowds of Patrons-Awards on Woman's Work, Horses, Cattle and Swine.

The attendance at the fair grounds yesterday was fully equal to that expected by the managers, and while not as large as will probably be on the grounds to-day and to-morrow, it was sufficient to make the main building and special exhibition sheds somewhat crowded at times. Vastly different from the crowd of school children that flocked in on Tuesday, the visitors yesterday were seemingly more eager to inspect the displays in a truly appreciative mood. The added facilities in the way of transportation to and from the grounds seems not even sufficient to make more comfortable the crowded cars on the northern lines, while even hundreds are daily compelled to walk. By those who know by experience, fair week is considered one continual rush of people, vehicles and peddlers, generally sufficiently large to stir up streets into stifling crowds of dust. Fortunately, this year the latter unpleasant feature has been avoided by the autumu-like weather, but otherwise the fair is the same bustling, driving time that it has been in former years. There is, however, a larger attendance and more extensive exhibits.

Nothing of special interest occurred yesterday, other than the general displays, the races, and the awards of premiums. In the morning those preferring to remain in the main building were treated at short intervals with lively selections from a brass band, stationed on the second floor, but even this attractive feature was withdrawn in the afternoon, the very time when most needed. All the exhibits were in their permanent arrangement by yesterday morning, and not until to-morrow night will any article to removed, so that today and to-morrow will be equally interesting days so far as the exhibits alone are concerned. The displays in the woman's department are attracting much attention on account of their excellence and variety. Quite a new departure in this line is an exhibit of several of the business firms of the city at the east end of the woman's floor, all under the personal direction of Mrs. A. M. partment, which has always been a popular one on account of its noique origin. Everything from a fancy silk quilt down to a few inches of common chain stitch in cloth is on parade, and sandwiched now and then among the gaily em-broidered articles may be seen perchance a pair of woolen socks knit by the hands of ninety years. Of lace work and embroidery there are cases without end, while further on may be been specimens of machine and hand-sewing, decorative art and fancy work. The kitchen is amply represented, and the cookies, cakes and sweetmeats are most popular among ladies and hungry children, whose curiosity on the one hand and appetite on the other can get no farther than the glass walls of a show-case. By the committee on premiums alone are these luxures destined to be handled, for each cake, glass of jelly and pie must be sampled before a fair decision can be reached. Mere observation will not suffice for the judges, when more than a square meal of delicacies is at stake.

All through the main building and on the ground, particularly in the machinery exhibits, the firms attempt to outdo each other in the way of cheap souvenirs to the public. Looking-glasses, canes, lead pencils and campaign puzzles are for those who choose to load themselves down with them, while chromo-cards and ad-vertisement books are distributed without end. In the woman's department the following premiums were awarded:

The races yesterday were much better at lended than on Tuesday, owing, probably, to the tact that they were given a more appreciative audience in the absence of the school children. Ladies, as well as gentlemen, were packed in the amphitheater, which, although of the capacity of 5,000, was well filled. The afternoon was a harder one upon the starters than they had on the day before, as the temperature had very perceptibly risen. The first race was a half-mile running heat, two best out of three. There were seven starters, as follows: Anna Verdia, owned by James Maloy, Rensselaer, Ind.; Sam Huston, by P. O. Jennings, Zionsville; Sly Fellow, owned by G. W. Blackburn, Madison; Bob Brown, owned by Robert Brown city: Ben Bolt, owned by S. J. Flemming, Terre Haute; Barney M., owned by M. Stark, Paris, Ill. Summary:

The concert given last night in the exposition building, by the Mendelssohn Society, under the direction of D. H. Baldwin & Co., was a trifle out of the usual line of attractions during fair week, but, nevertheless, drew a large crowd, week, but, nevertheless, drew a large crowd, which the reduction in the price of admission had a tendency to increase. The programme was musical throughout, and was most excellently rendered, both from a stand-point of skill and of entertainment. It was fully demonstrated that the plan of night performances not only increased the patronage of the fair, but is received with favor by those who attend. T-onight the Model will give another entertainment, which will be the last of the week.

The Horticultural Exhibit. The Horticultural Society met at the Statehouse, last night, to examine the displays to be made at the fair the remainder of this week by various members of the society, and to exchange methods of fruit cultivation. All of yes-

terday was devoted by the society at the fair grounds examining the exhibits. Addresses were made by several persons, and serious objections were made relative to the amount of premiums offered on horticultural displays. The amount given in prizes was no money for a great fruit-growing State, producing an abundance of apples, pears, grapes of the highest and best grades. Some expressed their dissatisfaction at the location given to the society. The exhibit to-day will be at the west end of the apple and fruit tables and will be in charge of Isham Sedgwick, Benjamin Shalton and James Coffin, who were appointed.

The discovery and practical application of natural gas in Indiana has brought into the State a large number of protectionist voters in connection with different industrial pursuits. Many of these bave now been in the State over a year, and will vote for Harrison. This class of voters cannot be less than 2.000. Conversions from the ranks of the Democracy are numerous and constantly increasing. This class of voters is much larger and more important in Indiana than outsiders imagine. The followers of Judge Gresham in Indiana are to the last man giving General Harrison a cordial support. given to the society. The exhibit to-day will be at the west end of the apple and fruit tables and will be in charge of Isham Sedgwick, Benjamin Shalton and James Coffin, who were appointed for that purpose last night. for that purpose last night. Mr. Coffin gave a very entertaining description of his experiment with a new seedling grape which he said was of the Concord character, both in taste and form. It was, he added, a grape from the seed of the Delaware. A unique transplanting apparatus, the invention of A. J. Root, of Ohio, was introduced by Benjamin Stratton. The larger part of the display of this society comes from Wayne county. The exhibitors are Joseph C. Rattiff, Benjamin Stratton, Daniel Bully, Jesse Stevens and Jacob D. Hampdon. The display of grapes by Isham Sedgwick is worthy of speliance. cial mention. There are thirteen varieties, which well worth seeing. Dr. Furnas, of Danville, and Samuel Thatcher, of Morristown, have a very fine display of apples, pears and peaches. There are a nuber of smaller exhibits, which,

however, will be excellent. A Showing of Famous Instruments. The most meritorious display in a musical way,

the best that has ever been made at any Indiana State fair, was that of D. H. Baldwin & Co. Not only were the pianos and organs shown of the well-known standard makes, which are as household words throughout the length and breadth of the land, but the quality of woods and the exquisite workmanship on these instruments received the praise of all who saw them. There is no firm in the United States that selects the woods for their pianos with such care as Decker Bros., and the fancy woods, such as San Domingo Mahogany and choice walnut in the pianos in D. H. Baldwin & Co.'s display are the richest that ever came from the manufactory. The Decker grand piano is used by the most prominent teachers in the State. These pianos

are matchless in tone and are the choice for the home and concert-room. The Estey organ came in for its usual meed of praise. There are now over 200,000 of this instrument in use and its popularity is constantly

The Story & Clark organ is here shown, beautiful in design and of elegant workmanchip. The musical quality of this instrument is unexcelled. D. H. Baldwin & Co., 95, 97 and 99 North Pennsylvania street, have adopted the payment plau as well as the cash plan in selling the valnable instruments here noticed. Thus they make it possible, by the exercise of a little economy, for any family to have an instrument of the very best quality in the house and to give to their children the benefit of a musical education. Don't fail to look at this display while at the fair, or call at the piano house in the New Denison Block, on North Pennsylvania street.

Japanese Furniture.

In strolling about the Exposition Building yesterday the writer was attracted by a cozy display of beautiful Japanese furniture, and upon inquiry learned it was the production of the Japanese Furniture and Manufacturing Company, No. 118 North Pennslvania street, this city. This firm is the very latest acquisition to the manufacturing interests of the city, and the large variety of all kinds and designs of delicate and exquisitely-finished furniture which they are placing on the market is already attracting wide attention. Their manufacture consists of bamboo easels, screens, tables, music-cases, stands, divans, cabinets and Japanese novelties. They import all their bamboo, and the coloring, polishing and general finish is done under their immediate supervision. Among the specimens they are exhibiting is a beautiful table containing 100 pieces of bamboo, the top finish in hardwood cak. Another piece was a divan upholstered in blue plush, which, in contrast with the rails of bamboo, comprises an elegant article of furniture. In fact, the entire collection which is exhibited is of a character which appeals to artistic taste, and will no doubt receive flattering praise from visitors

generally. The company is prepared to furnish estimates and designs for furniture, and also for interior decorations, such las wainscotings, ceilinge and so on.

A Scientific Exhibition. For the first time in the world natural gas under electrical control is exhibited this week at the State fair by J. W. Cheney, manager Indiana Electric Service Company. People who contemplate using natural gas or any other artificial heat will be interested in this exhibi-

Natural gas, uncontrolled, makes an intense heat, and the air you breathe, if overheated, has its health qualities destroyed, resulting in discomfort and disease, to say nothing of damage to house and furniture.

Electrical science has changed all this, and the combination with natural gas makes the citizens of Indianapolis among the most favored in the world. With this improvement they may have in their houses perpetual summer temperature all through the changeable seasons of artificial heat, giving them health and comfort.

The First Sale, People who capture first prizes are generally

looked upon as having achieved great honor. Then, is it not as great an honor to make the first sale, where there is so much competition? For, doubtless, the buyer had examined every article of like class before purchasing. In short, Mr. A. T. LaDuque, salesman for the Connersville Buggy Company, made the first sale at the exposition, by disposing of one of these popular

The company, with their usual enterprise, are making a fine exhibit, just west of the north entrance in the new building. Mr. L. T. Bower is present, and is receiving many of his old customers at the above location.

A Musical Wonder.

The Æolian organ, exhibited by Mr. R. E. Stephens, possesses the very meritorious point of not requiring a knowledge of music to play upon it. The most difficult pieces are rendered with ease, and the quality of the music is as sweet and perfect as that produced by the most accomplished performer. They are accurate teachers and afford the highest pleasure to the home circle. They are made of the very best material and highly finished. Mr. Stephens will send catalogue upon application.

Favors. Mr. C. W. Nickum has introduced an entirely new line of trade by way of the direct importation of French novelties, consisting of favors for weddings, parties and germans. His exhibit embraces many rare articles, and shows to what degree the Frenchman's skill is carried. He is the only importer of this class of goods in the His display is just to right of north stair-

Kansas City Journal.

Mr. W. S. Wilson, a well-known capitalist of this city and member of the firm of T. A. Har-ris & Wilson, has returned from a trip through Indiana, during which he studied closely the political situation of that State. He did not confine the source of his information to the leading men of either party, but talked with both Republicans and Democrats. He traversed the State and took occasion to observe the political sentiment of voters outside of the larger cities and towns. Mr. Wilson was seen by a Journal reporter yesterday and asked to give his impression of the political outlook in Indiana. In reply to a question he said:
"For ten years past I have been a close ob-

server of Indiana politics, and have a considerable acquaintance with its men and methods. At the end of the week just past I spent thirty hours in Indianapolis, the headquarters of both parties for the State's politics. I made diligent inquiry and obtained accurate information from the best and most reliable sources. I sought the opinions of the calm, political thinkers and workers, and the result of it all left a very definite impression upon my mind. Indianap-olis Democrats are undoubtedly experiencing a decided feeling of discouragement in regard to that State, and many things are com-You would be surprised to know the large num-ber of young men in Indiana who will cast their first vote in November, and the unanimity with which they will vote for Harrison is startling the Democracy. General Harrison a cordial support. Harmony and organization prevail to a perfect degree in the Republican party of Indiana, and I confidently predict that the State will give Harrison and Morton a majority of 10,000. It is not a question who will carry the State, but what Harrison's majority will be, and it is variously estimated from 10,000 to 20,000."

"Did you see General Harrison!" "I spent an hour Thursday evening with General Harrison, and I do not remember ever to have seen him looking so well. He looks and feels in excellent condition."

Trusts in England.

F. D. M." in Cincinnati Commercial Gazette, Some days ago I quoted in a letter the beginning of a leading editorial in the New York Times to show the refined and elegant style of the mugwump journals. It begins something and will be good returning five days from date like this: "Everyone knew that James G. Blaine lied when he said that there were trusts in Eng-

In this connection I quote the following from the London correspondent of a New York paper

"The American outery against trusts finds an echo here. A syndicate, with a capital of £3.000 .-000, has just secured a monopoly of salt, the price of which is forth with to be increased four fold. There is talk of a similar combine in coal. The luckless consumers call for legislative interference, and want to know whether syndicates can be prosecuted under the laws relating to unlawful conspiracy."

Why Shouldn't He Smile? Chicago News (Cieveland.)

Who can blame General Harrison for smiling a great deal just now! The Democrats who delighted in twitting him on his Chinese record have blundered over the Chinese exclusion bill in much the same way that a drunken man collides with a rocking-chair in the dark. The Democrats will talk very low about the Chinese question during the rest of this campaign.

BLOODY FRAUD IN ARKANSAS

Charges of Murder, Outrage and Wholesale Fraud in the Late Election.

Labor Men Shot Down-Democratic Clubs Said to Have Been Armed with State Rifles-Gov. Hughes Accused of Complicity.

New York Press, Tuesday. That the election in Arkansas on the 3d inst. was attended with more or less disturbance was briefly noted in the telegraphic returns on the following day. The Union Labor party failed to carry the State, and but little was said about the means used by the Democrats to defeat it. A letter from Mr. R. B. Carl Lee, a prominent leader of the Union Labor party and its principal candidate for Congress two years ago, contains a story of murder, outrage and fraud so startling that it is almost incredible. The letter was received in this city yesterday, and it is

"ST. LOUIS, Mo., Sept. 14.

"In Arkansas county they robbed us of the ballot-boxes at two townships with over 500 majority for us. In Union county Governor Hughes armed the Democratic clubs with the State Winchesters on the night before the election (Sunday). They paraded over the county and whipped over twenty colored men, some of them so badly that they had to keep their beds. On Monday they shot and killed seven white Union Labor men and wounded over twenty more, and at Eldorado, the county-seat, they took the poll books away from the judges and burned them before the eyes of the people and then held a new election at which no Union Labor man was permitted to vote.

"In Miller county the Democratic clubs were armed by Governor Hughes with the State's arms, and they went to the strong Union Labor precincts and notified them that if they voted the Union Labor ticket they would kill them. In Woodruff county they added over 1,000 votes to the Democratic vote, and defrauded us out of the election. In Crittenden county we had over 2,000 majority, this they cut down to less than 250. A delegation of white Wheelers immediately went to Little Rock and waited on Governor Hughes, giving him the facts, but he refused to take any action in the matter.

one of our men fired on them with squirrel shot, slightly wounding four of them. This is the only act of violence we are accused of in the State. I am sorry for this one.

"In Jackson county they secretly swindled us ont of over 1,000 votes. In Lincoln county they changed over 500 of our votes to them. In Howard county the same. In Lafayette county they stole over 400 votes from us by throwing them out. In Little River county they stole from 500 to 800 votes from us by counting us out. In Garland county about the same number in the same way. In Saline county they stole over 400 votes from us by changing. In Lonoke county, Eaglis's home, they refused to count Williams township, that gave us 352 majority. In Pope county they changed 400 or 500 votes, perhaps more, from our candidate to their candidate. In Conway county they stole 700 or 800 in the same Conway county they stele 700 or 800 in the same

"In Monroe county, at Pine Ridge, they forced the negroes to vote the Democratic ticket, saying: This is the ticket you have got to vote today.' In Pulaski county, the county in which Little Rock is situated, they stole nine ballotboxes and refused to count two others-a loss to us of over 3,000 votes. Besides this, they changed the votes in many of the other wards, so that they gave them, instead of ue, a majority.
"We undoubtedly carried the State and have been counted out. Our candidates are contesting, but I fear we can do nothing but show to the world the fraud that has been committed in a legal way, because the same fraud that gave them the State also gave them the Legislature; and it has to be fried before that body. You can use this letter as you see fit. Mind that it is not the Republisers that have been counted out, but the Union Labor ticket. The Republicans counted the Democrats out while they were in power, and now the Democrats count everybody out that is opposed to them. They have armed the Democratic clubs and made militia compamay be, we can never get it counted until the general government forces them to give us an

THE WONDERFUL CARLSBAD SPRINGS.

An Eminent Physician Reads a Paper of Great Interest before the International Medical Congress.

At the Ninth International Medical Congress, Dr. A. L. A. Toboldt, of the University of Pennsylvania, read a paper stating that out of thirty cases treat-ed with Carlsbad Water and the Powder Carlsbad Sprudel Salt for chronic constipation, hypochondria, disease of the liver and kidneys, jaundice, adiposis, di-abetes, dropsy from valvular heart disease, dyspepsia, catarrhal inflammation of the stomach, ulcer of the stomach or spleen, children with marasmus, gout, rheumatism of the joints, gravel, etc., twenty-six were entirely cured, three much improved, and one or address H. R. DERING, Assistant G. P. A., not treated long enough. Average time of treatment, four weeks. The Doctor claims, in conclusion of his paper, that the Carlebad Mineral Water, as exported by the city of Carlebad, being the natural product, is much to be preferred, where the quantity of water is no objection, particularly in diseases of the stomach. Whenever the quantity of water cannot be taken the Powder Carlsbad Sprudel Salt (genuine imported) will answer equally as well. He states that the ef-fect of the Water and Powder Sprudel Salt is to be relied upon, independently of any adjuncts of treatment, such as diet and exercise, etc. 'My experience with the genuine imported Carisbad Salt in powder form has been such that I may truly say that no remedy which I have employed, has given me as much pleasure and profit as this particular one." The dose of Salt is a teaspoonful three times a day dissolved in water. The GENUINE article is bottled under the supervision of the city of Carlsbad, and has the seal of the city, and the signature of Eisner & Mendelson Co. on the neck of every bottle. All others are worthless imitations. The genuine is never sold in bulk. Dr. Toboldt's paper and table of cases mailed to any address upon application to the agents of the Carlsbad Spring, Eisner & Mendelson Company, 6 Barclay Street, New York. For sale by all druggists. The genuine Johann Hoff's Mait Extract has the signature of "JOHANN HOFF" and "MORITZ EISNER," on the neck of every bottle. It is the best nutritive tonic in convalescence, dyspepsia, for the weak and debilitated. Beware of imitations. EIS-NER & MENDELSON Co. Sole Agents. For sale by

DO NOT BE DECEIVED

The Indianapolis Natural-gas Company expects to UNDERSELL ALL COMPETITORS in the gas business. We make all contracts for domes-

tic, store or office use at 30 per cent. off. We will add to these contracts a clause AGREEING AT THEIR TERMINATION TO CONTINUE TO SUPPLY GAS AS LOW OR LOWER THAN ANY COMPETITOR WILL THEN SUP. PLY YOU. Also, when the time comes, as it surely will, when it will be hard work to get a gas supply from any company, we shall give the preferance to our early patrons. The inducement that is being held out by others that they will next year or some other time

supply you at half price is MISLLADING and SUBTERFUGE. Buy only of the company that SELLS CHEAP NOW, and agrees in the contract to continue so to do. This gives you a certain advantage.
